**There is a 6% DBE Goal for this project

**Bonding is not required for subcontract work valued at less than \$100k. An alternative for bonding can be negotiated if necessary.

This project requires a specific percentage of participation by subcontractors that are certified as DBE firms by NCDOT. As such we aggressively pursue DBE participation by subcontractor listed in the NCDOT DBE directory, exceeding the minimum requirements. We ask that all subcontractors make efforts to solicit DBE participation.

The Balfour Beatty is willing to "break out" and/or combine portions of work into economically feasible units on a case-by-case basis to enable minority participation. DBE companies that are in need of assistance in obtaining bonding, insurance, equipment, materials and/or supplies relating to this bid opportunity may contact us and, upon review of your needs, we will direct you to the appropriate resource for assistance.
